Wierdos' Must-Haves

Eccentricity is a term at a blurred boundary, which changes as society develops in different cultural, political and ethical contexts. The project is informed by an interview I conducted with people about their peculiarities, such as photographing ear wax and smashing food. The outcome is a garment with a wild mixture of quirky elements constructed with fabric, cast latex bread and printed PVC textile. It is intended to encourage people to be aware of and understand the diversity and differences of each individual.
